

who we are

We help our clients reach new markets and drive revenue

For over two decades EdGate has supported the EdTech community, verifying that digital content meets global education requirements and improving asset discoverability by optimizing content with robust metadata tagging. The combination of our patented alignment methodology; library of over five million learning standards/skills; and suite of tagging tools, makes EdGate's solutions the most comprehensive on the market.

Custom Projects

We're flexible. Provide us with alignment or metadata parameters and we will deliver.

Interoperability

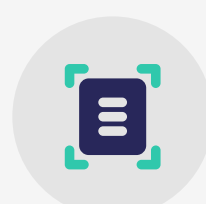

You need cross-platform functionality. That's why we also offer the open CASE Identifiers.

Save Time & Money

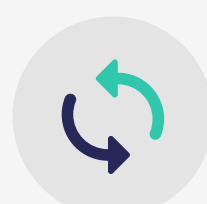

We track standards AND our system automatically re-aligns content to new or revised standards.

edgate's services

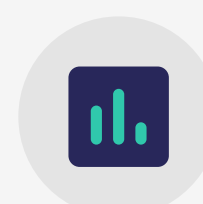

Alignment to Standards

Using the ExACT Correlation Tool, we provide the tools and resources to align education content to learning outcomes.

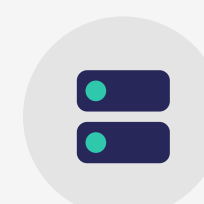

Standards Crosswalking

Have an existing correlation to standards? We crosswalk aligned resources and map to any set of applicable standards.

Alignment Analytics & Reporting

Use the ExACT reporting engine to create on-demand reports for presentations, RFPs or state adoptions.

Standards Database

We offer an enormous database of U.S. and international machine readable education standards and skills, all available via API.
